DEMO v1.1 · 27 October 2026

Çekicin AI — Partnership & Joint-Venture Programme

We are looking for companies and research partners to co-develop the AI modules of the Çekicin app.

DEMO · New section · No signed partner yet

Why partners?

Six AI modules already work as a demo; average progress is 58%. Most of the remaining work needs real data, field tests and integration — this is faster and more accurate with partners.

📷 1. Damage detection	70%
🧱 2. Repair decision & cost	55%
🔩 3. Part suppliers & prices	60%
🎙 4. Voice guidance	55%
📍 5. Nearby-place search	80%
🌱 6. Waiting time & environmental impact	30%

Damage AI demo: broken windscreen, 96% confidence

5 partnership models

🔬 1. R&D / research partnership

Who: University labs, public research centres, technopark R&D firms

How: Partner: method, independent testing, papers/theses · Çekicin: real problem, KVKK-consented data, field access

Route / tool: TÜBİTAK 1505 · 1711

🤝 2. Co-development / Joint venture

Who: Software / AI companies and research & advisory companies (Türkiye, Sweden / EU) that run the development part of this project with us

How: Contract-based joint project or a separate project company; IP, revenue share and roles are set in the contract

Route / tool: TÜBİTAK 1501 / 1507

🔌 3. Technology / integration partnership

Who: Insurers, vehicle assessors, fleet / rental companies, spare-part platforms

How: Use the modules in their own systems via API; licence or pay-per-use

Route / tool: API 1.11

📸 4. Data partnership

Who: Organisations with damage photos, repair invoices or part-price data

How: KVKK explicit-consent data only; in return a joint validation report and a more accurate model

Route / tool: KVKK

🌍 5. Distribution / regional partnership

Who: Tow networks, repair-shop chains, roadside-assistance firms in other countries

How: Regional use and adaptation (language, prices, address data)

Route / tool: M5 · 20/20

R&D funding routes (Türkiye, 2026)

Programme	Summary & source
TÜBİTAK 1505 — Üniversite-Sanayi İşbirliği	University = executing body, company = customer. 75% support for SMEs; 2026 TÜBİTAK contribution cap 2.3 million TL; up to 24 months. https://ettom.ogu.edu.tr/Duyuru/Detay/109/tubitak-teydeb-20261-cagrila…
TÜBİTAK 1711 — Yapay Zekâ Ekosistem	Customer company + at least one SME technology provider + at least one university lab. Up to 10 million TL, 24 months. The 2026 call closed on 2 October → target: the next call. https://tubitak.gov.tr/en/funds/industrial/national-support-programs/1…

TÜBİTAK 1501 / 1507 — Sanayi & KOBİ Ar-Ge	The company's own R&D project; 75% grant. 1507 (SME start-up): 3.5 million TL budget cap, up to 18 months. https://ettom.ogu.edu.tr/Duyuru/Detay/109/tubitak-teydeb-20261-cagrila...
Teknokent (ör. Fırat Teknokent, Elazığ)	Technical infrastructure, mentoring and an investor network for AI and software ventures. https://firatteknokent.com.tr/

Figures are from 2026 announcements; check the current call text before applying. Funding decisions are made by TÜBİTAK.

🇸🇪 International route: a Swedish research & advisory partner

Partner type wanted: a small research & advisory company registered in Sweden (AB – aktiebolag), working on evidence synthesis and research design, responsible (human-reviewed) AI, climate and health impact, and scientific communication.

Partner types

- 🔎 Research & advisory SME (main target): evidence synthesis, responsible AI, climate–health, scientific communication
- 🏛 State research institutes (e.g. RISE): applied research and testing
- 🎓 University research groups and EU grants offices
- 🚗 Mobility / insurtech SMEs (Eurostars co-lead)

What the partner brings

- M6 Environmental-impact module (30%): method design and validation with real data — the biggest gap
- AI Responsible AI: human oversight, EU AI Act and GDPR/KVKK readiness review, model cards
- M1–M2 Evidence synthesis: literature and benchmarks, independent review of accuracy measurements
- EU Scientific communication: Eurostars / Horizon proposals, English reports and papers

Programme	Summary & source
Eurostars (Eureka · Horizon Europe)	SME-led international R&D project; at least 2 countries, up to 36 months. Sweden (Vinnova): SMEs up to 50% of costs, research organisations up to 70%; at most SEK 5 million for the Swedish side (SEK 2 million if no Swedish SME). Türkiye (TÜBİTAK 1709 call / 1509): SMEs up to 75%, large companies 60%, universities up to 100%. The 2026 calls have closed (19 March, 10 September) → target: the next call in 2027. https://www.eurekanetwork.org/programmes-and-calls/eurostars/eurostars-m...
Vinnova — Eurostars (Sweden)	For Swedish applicants: the company's net sales or equity must be at least half of the requested amount. https://www.vinnova.se/en/calls-for-proposals/eurostars/eurostars-autumn...
Horizon Europe	Türkiye has been an associated country since 2021; collaborative projects need at least 3 partners from 3 countries. Swedish SMEs can get free proposal advice from EUSME Support. https://research-and-innovation.ec.europa.eu/strategy/strategy-research-...

🤝 Joint-venture structures

📑 Contractual consortium

Partners stay separate companies; a consortium agreement sets IP, roles and revenue share. The standard route for Eurostars / Horizon projects.

🏢 Joint project company (equity JV)

A separate company is set up at the product stage; shares follow each partner’s contribution.

🔑 Licence + revenue share

The research partner provides method and validation; the product stays with Çekicin; revenue share or licence fee.

> Legal and tax advice is needed to choose the structure and draft the contract.

Next steps

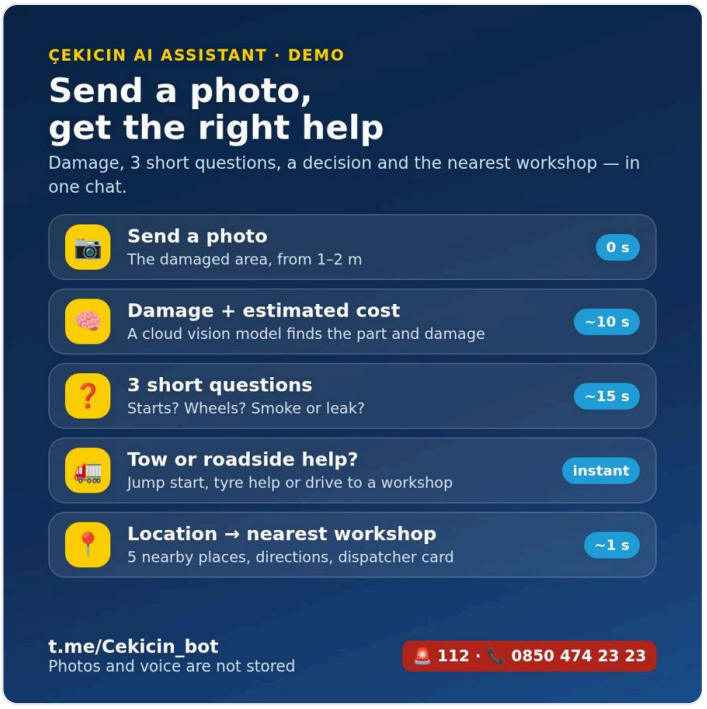

1. Intro + NDA with a suitable Swedish research & advisory partner
2. Joint pilot plan for M6 environmental impact (method + data)
3. Draft consortium agreement (IP, roles, revenue share)
4. Joint application to the next Eurostars call (TÜBİTAK + Vinnova)

Partner wanted for each module

Module	Progress	Partner wanted
📷 1. Damage detection	**70%**	Insurers / assessors: labelled real damage photos
🧱 2. Repair decision & cost	**55%**	Repair shops: real repair invoices
🔩 3. Part suppliers & prices	**60%**	Part sellers: stock & price API
🎙 4. Voice guidance	**55%**	Call centre / speech firm: Turkish speech tests
📍 5. Nearby-place search	**80%**	Tow & repair networks: verified addresses
🌱 6. Waiting time & environmental impact	**30%**	University: validation study with real data

Real damage photos improve the model (only with KVKK explicit consent)

Telegram assistant flow (demo)

Process: 5 steps

1. Intro call + non-disclosure agreement (NDA)
2. Joint goals, data and roles plan (1–2 weeks)
3. Pilot: 1 module, measured on real data (4–8 weeks)
4. Contract: co-development / licence / funding application
5. Measurement report and new release (in the admin panel)

What is ready today

- Live demo of the 6 modules — cekicin-site.elasa2next.workers.dev/ai-lab/modules.html
- Photo test (damage AI) — cekicin-site.elasa2next.workers.dev/ai-lab/model-test.html
- Telegram assistant — t.me/Cekicin_bot
- API 1.11 (health) — cekicin-ai-api.elasa2next.workers.dev/v1/health
- Roadmap report (PDF + video) — cekicin-site.elasa2next.workers.dev/ai-lab/report/index.html
- Release history (31 versions) — cekicin-site.elasa2next.workers.dev/ai-lab/changelog.html
